DATES: Written comments must be submitted on or before May 9, 2016.

ADDRESSES: Direct all written comments to Jennifer Jessup, Departmental Paperwork Clearance Officer, Department of Commerce, Room 6616, 14th and Constitution Avenue NW., Washington, DC 20230 (or via the Internet at Jjessup@doc.gov).

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection instrument and instructions should be directed to Shannon Penna, National Marine Fisheries Service (NMFS), West Coast Region (WCR) Long Beach Office, 501 West Ocean Blvd., Suite 4200, Long Beach, CA 90802, (562) 980-4238 or Shannon.Penna@noaa.gov.

SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for a revision and extension to the existing reporting requirements approved under OMB Control Number 0648-0204, West Coast Region Family of Forms. The West Coast Region (WCR) Permits Office administers permits required for persons to participate in Federally-managed fisheries off the West Coast under the Magnuson-Stevens Fishery Conservation and Management act, 16 U.S.C. 1801 *et seq.* There are three types of permits: Basic fishery permits for Highly Migratory Species (HMS), limited entry permits for Coastal Pelagic Species (CPS), and experimental fishing permits (EFP). The WCR Permits Office proposes to revise one permit within the collection of information approved under OMB Control Number 0648-0204.

Currently, under 50 CFR part 660.707, HMS permits are issued to vessels that fish for HMS off or land HMS in the States of California, Oregon, and

Washington. Permits are issued for a 2-year term and remain valid until the first date of renewal. The Inter-American Tropical Tuna Commission (IATTC) adopted amended Resolution C-11-06 which requires a vessel on the IATTC regional vessel registry to add a photograph of the vessel showing its identifying vessel markings. NMFS proposed to revise OMB Control Number 0648-0204 to require new and renewing applicants to submit a vessel photo with their application. Owners can email or mail photographs to the Long Beach Permits Office, which in turn will be submitted to the IATTC vessel database manager. Online submission option is expected to be available through the National Permits System (NPS) by 2016 year-end.

NMFS estimates this revision could affect up to 1639 respondents, which is the total number of permitted HMS vessels. Currently, HMS renewal forms are mailed to permit holders within 60 days prior to expiration. To reduce the expected burden from photo submission, pre-filled renewal forms with basic data will substitute the current renewal application. Forms can be completed by signing and dating a statement of acknowledgement that all current information is correct.

The basic information collected from applicants will remain the same. There will be minimal expected public burden to submit photographs, which will not apply after the initial photo is submitted. There will be no additional burden beyond the estimated application processing time or recordkeeping/reporting costs.

II. Method of Collection

Forms are available on the Internet; paper applications are also available and may be submitted by mail to the Long Beach Permits Office. In addition, an online submission option is available for Highly Migratory Species through the National Permits System.

III. Data

OMB Control Number: 0648-0204.

Form Number(s): None.

Type of Review: Regular submission (revision and extension of a current information collection).

Affected Public: Business or other for-profit organizations.

Proposed Information Collection; Comment Request; Fishery Observer Retention Survey

SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for a new information collection.

NOAA Fisheries utilizes observers to collect information on catch, bycatch, fishing efforts, biological characteristics, interactions with protected species, and socioeconomic information from United States (U.S.) commercial fishing and processing vessels. More information on the observer population is needed to support the Agency's conservation and management goals, to strengthen and improve fishery management decision-making, and to satisfy legal mandates under the Reauthorization of the *Magnuson-Stevens Fishery Conservation and Management Act* (MSA), the *Regulatory Flexibility Act* (RFA), the *Endangered Species Act*, and the *National Environmental Policy Act* (NEPA), *Executive Order 12866* (EO 12866), and other pertinent statutes.

The National Observer Program (NOP) is conducting a survey of fishery observers in order to investigate incentives and disincentives for remaining an observer and to identify their subsequent career choices. The data will be used by the NOP and regional observer programs to improve observer recruitment and retention rates. The survey results will be used by regional program managers to evaluate current observer provider contract requirements to increase observer retention. With a greater understanding of these data observer retention may increase as a result of improved recruitment for observers. Improved retention of qualified and experienced observers is expected to reduce training efforts and costs, and improve data quality. Observers are often the only independent data collection source for federal agency and scientists to collect at-sea data and are crucial in fishery management.

II. Method of Collection

Data will be collected via an electronic voluntary survey. We plan to distribute approximately 2000 surveys to the universe of active and former observers. The data will be collected anonymously and will not be released

for public use, except in aggregate without identification as to its source.

III. Data
