15X]

Notice of Realty Action: Segregation and Classification for Conveyance for Recreation and Public Purposes Patent, in Humboldt County, NV

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The Bureau of Land Management (BLM), Winnemucca District, Nevada, has found suitable for classification and conveyance 1,220 acres of public land in Humboldt County, Nevada, under the provisions of the Recreation and Public Purposes (R&PP) Act, as amended, and provisions of the Taylor Grazing Act. The City of Winnemucca proposes to use the land for a new wastewater treatment and effluent disposal facility to serve Winnemucca, Nevada.

DATES: Submit written comments regarding this conveyance, classification, segregation, on or before May 26, 2016.

ADDRESSES: Send written comments to Stephen Sappington, Field Manager, BLM Humboldt River Field Office, 5100 E. Winnemucca Blvd., Winnemucca, Nevada 89445.

FOR FURTHER INFORMATION CONTACT: Kurt Miers, Project Lead, by telephone at 775-623-1569 or email at wfoweb@blm.gov with City of Winnemucca R&PP (Miers) in the subject line. Persons who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1-800-877-8339 to contact the above individual during normal business hours. The FIRS is available 24 hours a day, 7 days a week, to leave a message or question with the above individual. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION: The City of Winnemucca proposes to construct a new wastewater treatment and effluent disposal facility in order to facilitate expansion/growth in the area. The current facility has been deemed by the USEPA and NDEP to be located in a

floodplain, creating a potential contamination source for the Humboldt River. Accordingly, a new facility must be constructed at a different location. The sale parcel is described as:

Mount Diablo Meridian, Nevada

T. 36 N., R. 37 E.,
Sec. 28;

Sec. 32, NE $\frac{1}{4}$, NW $\frac{1}{4}$, SW $\frac{1}{4}$, N $\frac{1}{2}$, SE $\frac{1}{4}$,
and W $\frac{1}{2}$, SW $\frac{1}{4}$, SE $\frac{1}{4}$.

The areas described aggregate 1,220 acres. 640 acres located in T. 36 N., R. 37 E., sec. 28, will be patented in year one, with 580 acres of T. 36 N., R. 37 E., sec. 32, to be patented in subsequent years in compliance with R&PP regulations.

The new plan of development will consist of a new wastewater treatment and effluent disposal plant, and effluent disposal facilities that include an effluent pipeline, rapid infiltration basins; a storage basin, an influent pumping station; and irrigation pivots.

The land is not required for any Federal purpose. The conveyance is consistent with the BLM Winnemucca District Office Resource Management Plan and the Record of Decision, dated May 2015, and is in the public interest. This proposal was analyzed as Environmental Assessment DOI-BLM-NV-W010-2014-0031.

The conveyance will be subject to the provisions of the R&PP Act and applicable regulations and will be subject to the following terms, conditions, and reservations of the United States:

1. A right-of-way is reserved for ditches and canals constructed by the authority of the United States, Act of August 30, 1890 (43 U.S.C. 945);

2. All mineral deposits in the lands so patented, and to it, or persons authorized by it, the right to prospect for, mine and remove such deposits from the same under applicable law and such regulations as the Secretary of the Interior may deem necessary are reserved to the United States, together with all necessary access and exit rights;

3. The parcel is subject to valid existing rights;

4. An appropriate indemnification clause protecting the United States from claims arising out of the patentee's use, occupancy, or occupation on the leased/patented lands;

5. No portion of the land patented shall revert back to the United States under any circumstance.

6. Additional terms and conditions that the authorized officer deems appropriate. Upon publication of this Notice in the **Federal Register**, the parcel will be segregated from all other forms of appropriation under the public land laws, including the mining laws,

except for conveyance under the R&PP Act, but not leasing under the mineral leasing laws and the mineral material disposal laws.

Written comments may be submitted concerning the suitability of the land for development for a new wastewater treatment and effluent disposal facility. Comments on the classification are restricted to whether the land is physically suitable for the proposed use, whether the use will maximize the future use or uses of the land, whether the use is consistent with local planning and zoning, or whether the use is consistent with state and Federal programs. Written comments can be submitted by postal service or overnight mail to the Field Manager, BLM Humboldt River Field Office. The land will not be offered for conveyance until after the classification becomes effective.

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Any comments regarding this sale will be reviewed by the BLM Nevada State Director who may sustain, vacate, or modify this realty action. In the absence of any adverse comments, this realty action will become the final determination of the Department of Interior.

Authority: 43 CFR 2741.5

David Kampwerth,

Field Manager, Humboldt River Field Office.

National Park Service

[NPS-IMR-GLAC- 19715; PPIMGLAC4G
PPMPSAS1Z.YP0000]

Fisheries Management, Aquatics Restoration, and Climate Change Response Plan, Environmental Impact Statement, Glacier National Park, Montana

AGENCY: National Park Service, Interior.

ACTION: Notice of Intent.

SUMMARY: The National Park Service (NPS) is preparing an Environmental Impact Statement (EIS) for the Fisheries

Management, Aquatics Restoration, and Climate Change Response Plan for Glacier National Park, Montana.

DATES: The NPS will accept comments from the public through May 11, 2016.

ADDRESSES: Information will be available for public review and comment online at <http://parkplanning.nps.gov/glac>, and in the office of the Superintendent, Jeff Mow, Glacier National Park, 1 Going-to-the-Sun Road, West Glacier, Montana 59936.

FOR FURTHER INFORMATION CONTACT: Mary Riddle, Chief of Planning and Compliance, Glacier National Park, P.O. Box 128, West Glacier, Montana 59936; (406) 888-7898.

SUPPLEMENTARY INFORMATION: This planning effort will result in an integrated and adaptive plan that addresses long-term goals for managing, restoring, and protecting the park's native fish and aquatic resources. The EIS will address issues related to the conservation and restoration of native aquatic systems across the park, including ongoing losses of native fish populations (e.g., federally listed threatened bull trout and state listed westslope cutthroat trout) due to invasive non-native fish species; threats to native fish from climate change; opportunities to improve native aquatic ecosystem resilience and provide refugia for native fish from the effects of climate change; and impacts from fisheries management actions to wilderness character in the park's backcountry.

The NPS proposed action includes the following elements: (1) The translocation of native fish to appropriate habitat; (2) the construction of additional fish passage barriers to prevent non-native fish from moving into native fish habitat; and (3) the removal of invasive non-native fish using mechanical (such as netting, trapping, angling, electrofishing) and chemical (poisonous substance used to kill fish; piscicide) methods, where appropriate. Following removal of non-native fish, some waters may be repopulated with species native to the park while others would be left to recover to their historically fishless state. The proposed action will also evaluate the establishment of a fishing permit fee to help fund needed fishery restoration and conservation actions.

The proposed action is the initial NPS proposal to address the purpose and need for taking action. It represents one alternative that will be considered during the EIS process. In addition to the proposed action, the NPS will consider a no-action alternative, an

alternative that would include the same elements as the proposed action but use mechanical methods only to remove non-native fish, and an alternative that uses chemical methods only to remove non-native fish. The NPS will also consider other alternatives that are suggested during the scoping period, as appropriate. The NPS will not select an alternative for implementation until after a final EIS is completed.

A scoping brochure will be available that describes the purpose and need for the plan, and the issues and alternatives identified to date. Copies may be obtained from Mary Riddle, Chief of Planning and Compliance, Glacier National Park, P.O. Box 128, West Glacier, Montana 59936; (406) 888-7898. If you wish to comment on the scoping brochure or on any other issues associated with the EIS, you may submit your comments by any one of several methods. You may mail comments to Glacier National Park, Attn: Fisheries Management Plan, P.O. Box 128, West Glacier, Montana 59936; you may comment via the Internet at <http://parkplanning.nps.gov/glac> you may hand-deliver comments to Glacier National Park Headquarters, West Glacier, Montana; and you may submit comments during public meetings that will be held during the comment period. Information on meeting dates, times, and locations will be included in the public scoping brochure and will also be available at: <http://parkplanning.nps.gov/GLAC> (click on the project link and then the "meeting notices" tab).

Comments will not be accepted by fax, email, or in any other way than those specified above. Bulk comments in any format and hard copy and electronic comments that are submitted on behalf of others will not be accepted. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Dated: January 1, 2016.

Sue E. Masica,
*Regional Director, Intermountain Region,
National Park Service.*

Editorial Note: This document was received for publication by the Office of the Federal Register on April 6, 2016.

BILLING CODE 4312-CB-P

DEPARTMENT OF THE INTERIOR

Bureau of Reclamation

Notice of Intent to Accept Proposals, Select Lessee(s), and Contract for Pumped-Storage Hydroelectric Power Development on Anderson Ranch Reservoir, Boise Project, Idaho

AGENCY: Bureau of Reclamation, Interior.

ACTION: Notice.

SUMMARY: Current Federal policy allows non-Federal development of electrical power resource potential on Federal water resource projects. The Bureau of Reclamation (Reclamation) will consider proposals for non-Federal development of a pumped-storage hydroelectric power utilizing Anderson Ranch Reservoir as the lower impoundment for a pumped-storage project. Reclamation is considering such hydroelectric power development under its lease of power privilege (LOPP) process and regulations.

The Federal Energy Regulatory Commission (FERC) also has jurisdiction in this case. FERC jurisdiction applies to all elements of a proposed pumped-storage hydroelectric power project at Anderson Ranch Reservoir that are outside of Reclamation facilities and lands. In this case, FERC jurisdiction will include the upper reservoir, a large part of the penstock connecting the upper reservoir with Anderson Ranch Reservoir, and other facilities (such as power transmission lines and access roads that are outside of Reclamation jurisdiction).

DATES: A written proposal and seven copies must be submitted on or before 4 p.m. (Mountain Standard Time) on September 8, 2016. A proposal will be considered timely only if it is received in the office of the Area Manager on or before 4 p.m. on the above-designated date. Interested entities are cautioned that delayed delivery to the Area Manager's office due to failures or misunderstandings of the entity and/or of mail, overnight, or courier services will not excuse lateness and, accordingly, are advised to provide sufficient time for delivery. Late proposals will not be considered.

ADDRESSES: Send written proposal and seven copies to Mr. Roland Springer, Area Manager, Bureau of Reclamation, Snake River Area Office, 230 Collins Road, Boise, ID 83702-4520; telephone (208) 383-2248.

FOR FURTHER INFORMATION CONTACT: Questions regarding proposal requirements or technical data available for Anderson Ranch Reservoir may be
