

in good operating order, well-tuned, and functioning according to manufacturer specifications, in order to decrease pollutant concentrations and volumes in small boat engine wet exhaust.

(c) To the greatest extent practicable, low sulfur or alternative fuels must be used to reduce the concentration of pollutants in discharges from small boat engine wet exhaust.

(d) To the greatest extent practicable, use four-stroke engines instead of two-stroke engines for vessels generating small boat engine wet exhaust.

(e) Vessels using two-stroke engines must use environmentally acceptable lubricants unless use of such lubricants is technologically infeasible. If technologically infeasible, the use and justification for the use of a non-environmentally acceptable lubricant must be recorded in the vessel recordkeeping documentation.

§§ 1700.34–1700.37 [Reserved]

§ 1700.38 Welldeck discharges.

(a) Welldeck discharges that contain graywater from smaller vessels are prohibited.

(b) Welldeck discharges containing washdown from gas turbine engines are prohibited within three miles of the United States and to the greatest extent practicable must be discharged seaward of waters subject to UNDS.

(c) Welldeck discharges from equipment and vehicle washdowns must not contain garbage and must not contain oil in quantities that:

- (1) Cause a film or sheen upon or discoloration of the surface of the water or adjoining shorelines; or

Endangered and Threatened Wildlife and Plants; Endangered Species Status for Rusty Patched Bumble Bee

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), determine endangered species status under the Endangered Species Act of 1973 (Act), as amended, for the rusty patched bumble bee (*Bombus affinis*), a species that occurs in the eastern and Midwestern United States and Ontario, Canada. The effect of this regulation will be to add this species to the List of Endangered and Threatened Wildlife.

DATES: This rule becomes effective February 10, 2017.

ADDRESSES: This final rule is available on the internet at <http://www.regulations.gov> and on the Midwest Region Web site at <http://www.fws.gov/midwest/Endangered/>. Comments and materials we received, as well as supporting documentation we used in preparing this rule, are available for public inspection at <http://www.regulations.gov>. Comments, materials, and documentation that we considered in this rulemaking will be available by appointment, during normal business hours at: U.S. Fish and Wildlife Service, Twin Cities Ecological Services Field Office, 4101 American Blvd. E., Bloomington, MN 55425; telephone 952-252-0092, extension 210.

FOR FURTHER INFORMATION CONTACT:

Peter Fasbender, Field Supervisor, U.S. Fish and Wildlife Service, Twin Cities Ecological Services Field Office, 4101 American Blvd. E., Bloomington, MN 55425, by telephone 952-252-0092, extension 210. Persons who use a telecommunications device for the deaf (TDD) may call the Federal Relay Service at 800-877-8339.

SUPPLEMENTARY INFORMATION:**Executive Summary**

Why we need to publish a rule. Under the Endangered Species Act, a species may warrant protection through listing if it is endangered or threatened throughout all or a significant portion of

its range. Listing a species as an endangered or threatened species can only be completed by issuing a rule. This rule will finalize the listing of the rusty patched bumble bee (*Bombus affinis*) as an endangered species.

The basis for our action. Under the Endangered Species Act, we can determine that a species is an endangered or threatened species based on any of five factors: (A) The present or threatened destruction, modification, or curtailment of its habitat or range; (B) Overutilization for commercial, recreational, scientific, or educational purposes; (C) Disease or predation; (D) The inadequacy of existing regulatory mechanisms; or (E) Other natural or manmade factors affecting its continued existence. While the exact cause of the species' decline is uncertain, the primary causes attributed to the decline include habitat loss and degradation, pathogens, pesticides, and small population dynamics.

Peer review and public comment. We sought comments on the species status assessment (SSA) from independent specialists to ensure that our analysis was based on scientifically sound data, assumptions, and analyses. We also invited these peer reviewers to comment on our listing proposal. We also considered all comments and information received during the public comment period.

An SSA team prepared an SSA for the rusty patched bumble bee. The SSA team was composed of U.S. Fish and Wildlife Service biologists, in consultation with other species experts. The SSA represents a compilation of the best scientific and commercial data available concerning the status of the species, including the impacts of past, present, and future factors (both negative and beneficial) affecting the rusty patched bumble bee. The SSA underwent independent peer review by 15 scientists with expertise in bumble bee biology, habitat management, and stressors (factors negatively affecting the species). We incorporated peer review suggestions into the SSA. The SSA and other materials relating to this final rule can be found on the Midwest Region Web site at <http://www.fws.gov/midwest/Endangered/> or on <http://www.regulations.gov>.
