List of Subjects
The Amendment

I. Background

In 1994, the Federal Aviation Act was revised and codified within Subtitle VII of Title 49 of the United States Code (Pub. L. 103–272, July 5, 1994). Since the codification, the Department has made numerous amendments to make

the CFR consistent with the provisions of the current statute (49 U.S.C., Subtitle VII). Some provisions, however, remained unchanged, due in part to the complexity of certain issues, such as antitrust immunity, agreements, and waivers. This rule updates the economic regulations by modifying language to reflect current statutory provisions related to these remaining issues. The revised language does not diminish any existing Civil Aeronautics Board (CAB) provisions or precedent still in effect.

II. Discussion of the Final Rule

This rule updates the regulatory language throughout 14 CFR parts 200 through 399 in the following ways: (1) Where references to the CAB are no longer relevant, replaces the term “Board” or “CAB”, where appropriate, with “Department”, “DOT” or “Predecessor”; (2) removes citations to the “Federal Aviation Act” or “Act” and adds citations to the appropriate sections of Title 49 of the United States Code; (3) inserts current names of forms in place of outdated references to CAB forms; (4) adds up-to-date titles for offices within the Department; and (5) updates the authority citations, where needed.

Additional changes are as follows:

Part 204 describes the data the Department uses to support carrier fitness determinations. Section 204.4 discusses carrier obligations for proposing to provide essential air service. The section is no longer in use and is obsolete. As such, the section is removed in its entirety.

Parts 207 and 208 address U.S. scheduled and charter air carrier requirements with respect to charter trips. Both parts refer to 14 CFR part 212 in describing carrier obligations on charter air transportation and contain no independent obligations of their own. As such, these parts are obsolete and are removed.

Part 221 describes carrier obligations with respect to tariffs. This rule revises part 221 by broadening the language used to refer to international treaties. The current regulation refers to the Warsaw Convention, which is no longer the relevant international treaty applicable to travelers on many itineraries. The rule updates and simplifies existing passenger notification requirements and consolidates such requirements into a single section. Specifically, the rule consolidates separate notice requirements for liability from death or injury and liability from damage to baggage into a single notice requirement that better reflects the current international landscape, including

references to the 1999 Montreal Convention, which governs many international itineraries originating or terminating in the United States. Currently, a carrier's liability can be limited under the 1999 Montreal Convention to 4,694 SDR for damages caused by the delay of passengers and 1,131 SDR for damages resulting from the destruction, loss, damage, or delay of baggage. This rule removes references to agreements approved by CAB order. Carriers are provided until December 31, 2019, to comply with the signage requirements of this part, while compliance with the ticket notification changes is required on the effective date of this final rule. Airlines for America recommends that current stocks of paper notices be allowed to be used until exhausted. However, the change in liability amounts occurred in 2009 and we do not believe carriers still have significant stocks of paper notices with outdated information. *See* Inflation Adjustments to Liability Limits Governed by the Montreal Convention Effective December 30, 2009, 74 FR 59017 (Nov. 16, 2009). Moreover, the Department has consistently required that paper and e-ticket notices used to inform consumers of their rights and airline policies regarding such liability provide accurate information. Accordingly, we do not believe it is appropriate to allow airlines to continue to distribute inaccurate paper notices to the extent any are doing so.

Part 223 sets forth rules regarding free and reduced-rate transportation. This rule updates part 223 by removing references to specific sections of the “Act” such as “under section 408 of the Act.” Additionally, in § 223.1, the term “handicapped passenger” is used to describe a person with a disability. However, under the Americans with Disabilities Act (ADA), the current practice is to use “person-first” terminology (e.g., changes “handicapped person” to “person with a disability”). Where applicable, as the Department reviews its regulations, the term “handicapped” is replaced with the person-first terminology in alignment with the ADA. This rule removes the term “Handicapped passenger” and replaces it with the term “passenger with a disability.”

Part 232 established procedures for a party aggrieved by an order of the Postmaster General to request a review by DOT. In 2008, amendments to 49 U.S.C. 41902 removed from the statute the authority for the Secretary of Transportation to amend, modify, suspend, or cancel an order of the Postal Service (Pub. L. 110–405, Jan. 4, 2008). Accordingly, the statutory basis for part

232 regulations no longer exists and part 232 is removed.

Part 234 describes the requirements for filing airline service quality performance reports. The existing citation of authorities for this part contains an error. This rule corrects the error.

Part 241 describes a uniform system of accounts and reports for large carriers. This rule removes section 01 of part 241 which restated outdated statutory text and could lead to confusion if retained.

Part 272 established essential air service procedures for the Freely Associated States comprising the Federated States of Micronesia (Ponape, Truk and Yap), the Marshall Islands (Majuro and Kwajalein), and Koror in Palau. The procedures include requirements for airlines to file notice before suspending service, an obligation to continue to provide service when subsidy is available, and carrier-selection criteria. Section 272.12 states, "These provisions shall terminate on October 1, 1998, unless the essential air service program to the Federated States of Micronesia, the Marshall Islands and Palau is specifically extended by Congress." Congress did not extend the program (Pub. L. 101–219, Sec. 110(b), (Dec.12,1989)). Thus, the statutory basis for the regulation no longer exists and part 272 is removed.

Part 300 sets forth the rules of conduct in DOT proceedings involving aviation economic and enforcement matters. Many of these rules set forth standards of ethical conduct applicable to DOT employees with respect to aviation economic matters. DOT employees are also subject to the ethics requirements of 49 CFR 99.735–1. In order to reduce the duplicative nature of both sets of ethics requirements and to minimize the potential for confusion over such requirements, several sections of part 300 are removed under this rule. The resulting regulations ensures consistent ethical standards across all employees of the agency.

Part 302 sets forth the Rules of Practice in Proceedings before the DOT. Part 305 describes the Rules of Practice for Informal Nonpublic Investigations undertaken by the Office of Aviation Enforcement and Proceedings. Part 385 sets forth the authorities and functions of various DOT officials. On August 17, 2012, the Department issued an extensive revision to 49 CFR part 1 (Organization and Delegation of Powers and Duties) [77 FR 49965]. The Department is revising parts 302, 305, and 385 to reflect the changes set forth in the revision to part 1.

Part 330 established procedures implementing the airline compensation section of the Air Transportation Safety and System Stabilization Act, which was enacted following the terrorist attacks of September 11, 2001, Public Law 107–42, (Sept. 22, 2001) (the Stabilization Act). Section 103 of the Stabilization Act appropriated up to \$5 billion, to be administered by the Department of Transportation, to compensate air carriers for losses they incurred due to the attacks. Part 330 set out carrier eligibility criteria; forms for applying for the compensation payments; details on types of losses that would and would not be eligible for compensation; audit procedures; and details on a set-aside program for certain air taxis, commuter carriers, and other small carriers. Of the 427 applications processed, 407 applicants were deemed eligible under part 330. These carriers received payments in a total amount of \$4.6 billion. All eligible appropriations were completed and payments processed and paid, and all functions and responsibilities under this section were fulfilled. As a result, part 330 serves no further purpose and is removed.

Part 374 specifies the Department's responsibility for enforcing air carrier and foreign air carrier compliance with the applicable requirements of the Consumer Credit Protection Act. This rule revises part 374 by updating the language in § 374.3 regarding references to Regulation B, 12 CFR part 202, and Regulation Z, 12 CFR part 226. Enforcement responsibility for parts 202 and 226 has been divided and reassigned among Federal government agencies. Accordingly, the language in § 374.3 is revised to reference the current applicable regulations, 12 CFR part 1026.

Part 380 is applicable to public charter air transportation in interstate or foreign air transportation. This rule revises part 380 by updating appendices A and B. Part 380 sets forth the Department's rules governing Public Charter air transportation of passengers whether furnished by direct air carriers or Public Charter Operators. Appendices A and B to part 380, respectively, contain the format for the Public Charter Operator's Surety Bond and the Public Charter Surety Trust Agreement. Since the existing appendices A and B to part 380 were published in 1998, various changes have been made to both documents. Therefore, appendices A and B is updated to provide the most current format for the Public Charter Operator's Surety Bond and the Public Charter Surety Trust Agreement.

In part 385, the Secretary of Transportation delegates certain continuing assignments of authority to Secretarial Officers regarding the Department's functions of issuing orders or other determinations pursuant to 49 U.S.C. 322 and 49 CFR part 1. The Secretary determined that several of the items currently prepared for decision at the Assistant Secretary level could be handled more efficiently at the Office Director level, thereby providing more time for the Assistant Secretary and immediate secretarial staff to concentrate on controversial and policy-sensitive issues. This action ensures that routine items are processed in a much more timely and efficient manner. Thus, this rulemaking amends §§ 385.12 and 385.13 to reflect the expanded assignments of authority to the Director of the Office of Aviation Analysis and the Director of the Office of International Aviation, both in the Office of the Assistant Secretary for Aviation and International Affairs.

Section 385.12 defines the authority of the Director of the Office of Aviation Analysis. This rule authorizes the Director to issue Essential Air Service (EAS) Requests for Proposals and certain final EAS selection orders. This expanded delegation alone relieves the Assistant Secretary for Aviation and International Affairs of reviewing nearly sixty orders per year, saving over three hundred (300) hours of senior management time and approximately one hundred twenty (120) hours of staff time in the Office of Aviation Analysis. This rule expands the Director's authority to issue quarterly fuel rate adjustments to Alaskan bush and mainline mail rates and to issue certain procedural orders in antitrust immunity cases processed under 49 U.S.C. 41308 and 41309. This rule also removes paragraphs (f), (h), and (i) of § 385.12, as these requirements are placed under the authority of the Director of the Office of International Aviation in § 385.13. Accordingly, paragraphs (g), (j), and (k) are re-designated.

Section 385.13 defines the authority of the Director of the Office of International Aviation. This rule amends paragraph (a) of § 385.13 to grant the Director the authority to issue final orders on uncontested tariff exemptions. This rulemaking also amends paragraph (b) to authorize the Director to issue final orders on uncontested applications for U.S. carrier certificate and foreign air carrier permit authority. Further, this action adds two new subsections regarding fares and tariffs and amends § 385.13(r)(1) to give the Director the authority to exempt

IATA¹ agreements under section 41309; this is in addition to the Director's existing authority to approve or disapprove such agreements. This rule also adds new paragraphs (z) through (dd) that: (1) Authorize the Director to issue orders and notices adjusting the Standard Foreign Fare Level; (2) authorize the Director to issue notices updating the list of country-pair markets in tariff-filing categories under part 293 of this chapter; (3) give the Director assigned authority as to certain matters processed by the Office of International Aviation's U.S. Air Carrier Licensing/Special Authorities Division; and (4) add requirements moved from § 385.12(f), (h), and (i).

Sections 385.14 and 385.15 define the authority of the General Counsel and Deputy General Counsel, respectively. Consistent with the delegation of duties assigned in 49 CFR part 1, as revised on August 16, 2012, by 77 FR 49964, the Secretary assigned several duties to the General Counsel. Sections 385.14 and 385.15 are revised to reflect this assignment of duties. This rule removes § 385.15 and transfers its functions to § 385.14.

Part 389 describes fees and charges for special services. This rule amends part 389 by (1) removing references to organizations and position titles that no longer exist and replacing them with references to appropriate organizations and positions, (2) correcting the filing fees charged for special services to reflect a recent rulemaking action, (3) allowing for payment of filing fees using the internet, and (4) revising the descriptions of licenses for which the Department charges filing fees.

Part 398 establishes guidelines for the determination of basic essential air service. The Department amends part 398 by removing an outdated provision for funding reductions in § 398.11. Section 398.11 was superseded by Public Law 106–69, Title III, section 332, October 9, 1999, 113 Stat. 1022.

Part 399, subpart C, sets forth the Department's policies related to rates and tariffs. This rulemaking action removes fourteen sections from this subpart (§§ 399.30, 399.31, 399.32, 399.33, 399.34, 399.37, 399.40, 399.41, 399.42, 399.43, 399.44, 399.63, 399.101, and 399.111). These sections are obsolete because of the Airline Deregulation Act of 1978 and the Civil Aeronautics Board Sunset Act of 1984.

While not originally proposed in the notice of proposed rulemaking (NPRM) published on May 9, 2018 (83 FR 21684), this final rule also updates the section reference for the definition of

small aircraft found in § 399.73 from “§ 298.3” to “§ 298.2”. Under the Administrative Procedure Act, an agency may waive the normal notice and comment procedures if the agency, for good cause, finds that those procedures are impracticable, unnecessary, or contrary to the public interest. See 5 U.S.C. 553(b)(B). Since this amendment is merely a minor technical correction, notice and comment are unnecessary.

III. Comment Discussion

OST received two comments in response to the NPRM and is adopting one drafting correction and a change in characterization of the coverage limits of the Montreal Convention that were proposed in the Airlines 4 America (A4A) comment. The second comment was filed by the International Air Transport Association (IATA).

The Department appreciates the constructive input by both commenters. However, as this rulemaking is intended as an administrative “clean-up” action, the majority of the IATA and A4A comments propose policy changes to the Department's regulations that were not contemplated in the NPRM underlying this final rule. Because the changes requested by the commenters are outside the scope of the NPRM, the Department declines to adopt them as part of this final rule. However, the Department will continue to consider them as we review our existing regulations as announced in an October 2, 2017, Notification of Regulatory Review (82 FR 45750).

OST is also adopting an additional, minor modification to a reference in § 399.73, as noted above. These changes are described further in the Discussion of the Final Rule section above.

IV. Regulatory Analyses and Notices

A. Executive Order 12866 and DOT Regulatory Policies and Procedures

This rulemaking is not a significant regulatory action under Executive Order 12866 and the Department's Regulatory Policies and Procedures. Its provisions involve technical amendments to update statutory references and to update the titles and addresses of offices. The rule also removes certain appendices, sections, and forms that are no longer relevant. This rule does not create any major policy changes or impose significant new costs or burdens.

B. Executive Order 13771 (Reducing Regulation and Controlling Regulatory Costs)

This final rule is considered an E.O. 13771 deregulatory action. This final

rule repeals a number of sections and whole parts from the Code of Federal Regulations that have been identified as outdated, unnecessary, or ineffective, thus reducing the Department's regulatory footprint. This final rule also modifies the Department's other regulations to ensure that they are consistent with existing laws, procedures, and practice. Cost savings associated with this deregulatory action are not quantifiable.

C. Regulatory Flexibility Act

Pursuant to section 605 of the Regulatory Flexibility Act (RFA), 5 U.S.C. 605(b), as amended by the Small Business Regulatory Enforcement Fairness Act of 1996 (SBREFA), I hereby certify that this rulemaking does not have a significant impact on a substantial number of small entities. The final rule imposes no duties or obligations on small entities.

D. Executive Order 13132 (Federalism)

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on State or local governments and would either preempt State law or impose a substantial direct cost of compliance on them. The Department has analyzed this rulemaking in accordance with the principles and criteria contained in the Order and determined that it does not have implications for federalism, since it merely makes technical amendments to the existing regulations. This final rule does not have a substantial direct effect on, or sufficient federalism implications for, the States, nor does it limit the policymaking discretion of the States.

E. Executive Order 13175

This final rule has been analyzed in accordance with the principles and criteria contained in Executive Order 13175 (“Consultation and Coordination with Indian Tribal Governments”). Because this rulemaking does not significantly or uniquely affect the communities of the Indian tribal governments or impose substantial direct compliance costs on them, the funding and consultation requirements of Executive Order 13175 do not apply.

F. Paperwork Reduction Act

The Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501 *et seq.*) requires that DOT consider the impact of paperwork and other information collection burdens imposed on the public and, under the provisions of PRA section 3507(d), obtain approval from the Office of Management and Budget (OMB) for each collection of

¹ International Air Transport Association.

information it conducts, sponsors, or requires through regulations. The DOT has determined there are no new information collection requirements associated with this final rule.

G. National Environmental Policy Act

The agency has analyzed the environmental impacts of this action pursuant to the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321 *et seq.*) and has determined that it is categorically excluded pursuant to DOT Order 5610.1C, Procedures for Considering Environmental Impacts (44 FR 56420, Oct. 1, 1979). Categorical exclusions are actions identified in an agency's NEPA implementing procedures that do not normally have a significant impact on the environment and therefore do not require either an environmental assessment (EA) or environmental impact statement (EIS). The purpose of this rulemaking is to make editorial corrections, remove obsolete references, and update outdated provisions in the Department's aviation economic regulations. The agency does not anticipate any environmental impacts, and there are no extraordinary circumstances present in connection with this rulemaking.

Appendix A to Part 217—Instructions to Foreign Air Carriers for Reporting Traffic Data on Form 41 Schedule T-100(f)

(a) General instructions.

(1) Description. Form 41 Schedule T-100(f) provides flight stage data covering both passenger/cargo and all cargo operations in scheduled and nonscheduled services. The schedule is used to report all flights which serve points in the United States or its territories as defined in this part.

(2) Applicability. Each foreign air carrier holding a section 41302 permit or exemption authority shall file Schedule T-100(f).

(3) Reports required by this section shall be submitted to the Bureau of Transportation Statistics in a format specified in accounting and reporting directives issued by the Bureau of Transportation Statistics’ Director of Airline Information.

(4) Filing period. Form 41 Schedule T-100(f) shall be filed monthly and is due at the Department thirty (30) days following the end of the reporting month to which the data are applicable.

(b) Preparation of Form 41 Schedule T-100(f):

(1) Explanation of nonstop segments and on-flight markets. There are two basic categories of data, one pertaining to nonstop segments and the other pertaining to on-flight

markets. For example, the routing (A–B–C–D) consists of three nonstop segment records A–B, B–C, and C–D, and six on-flight market records A–B, A–C, A–D, B–C, B–D, and C–D.

(2) Guidelines for reporting a nonstop segment. A nonstop segment is reported when one or both points are in the United States or its territories. These data shall be merged with that for all of the other reportable nonstop operations over the same segment. Nonstop segment data must be summarized by aircraft type, under paragraph (h)(1) of this appendix, and class of service, paragraph (g)(1)(v) of this appendix.

(3) Rules for determining a reportable on-flight market. On-flight markets are reportable when one or both points are within the U.S., with the following exceptions: (i) Do not report third country to U.S. markets resulting from flight itineraries which serve a third country prior to a homeland point in flights passing through the homeland bound for the U.S.; and (ii) do not report U.S. to third country markets resulting from itineraries serving third country points subsequent to a homeland point in flights outbound from the U.S. and passing through the homeland. In reporting data pertaining to these two exceptions, the traffic moving to or from the U.S. relating to the applicable prior or subsequent third countries (referred to as “behind” or “beyond” traffic) is to be combined with the applicable foreign homeland gateway point, just as though the traffic were actually enplaned or deplaned at the homeland gateway, without disclosure of the actual prior or subsequent points. Applicable flights are illustrated in examples (6) and (7) under paragraph (c) of this appendix.

(c) Examples of flights. Following are some typical flight itineraries that show the reportable nonstop segment and on-flight market entries. The carrier’s homeland is the key factor in determining which on-flight markets are reportable.

(1) SQ flight # 11 LAX—NRT—SIN. This is an example of a flight with an intermediate foreign country. It is not necessary to report anything on the NRT—SIN leg.

(2) SQ flight #15 LAX—HNL—TPE—SIN. This is an example of two U.S. points, an intermediate third country, and a homeland point. Information is reportable on only the

on-flight markets and nonstop segments that consist of one or both U.S. points.

(3) LB flight # 902 LPB-VVI-MAO-CCS-MIA. This flight serves two homeland points and two different foreign countries before terminating in the U.S. Nonstop segment information is required only for the nonstop segment involving a U.S. point. On-flight market information is required in 4 of the 10

markets, LPB-MIA and VVI-MIA, since these involve homeland and U.S. points; MAO-MIA is necessary to show traffic carried into the U.S., and CCS-MIA for the same reason, and also because in all cases where a nonstop segment entry is required, a corresponding on-flight market entry must also be reported.

(5) QF flight #25 SYD-BNE-CNS-HNL-YVR. This flight serves three homeland points, a U.S. point, and a subsequent third country. Nonstop segment information is required on the respective legs into and out of the United States. All on-

flight market entries involving the U.S. point HNL are also required. Data are not required on the homeland to homeland markets, or the homeland—third country markets.

and cargo shall be shown as enplanements in the NRT—SFO on-flight market entry. These volumes are included by definition in the

(7) JL flight #001 SFO—NRT—HKG. This flight is the reverse sequence of flight #002 above; it requires a nonstop segment entry covering SFO—NRT, and a single on-flight market entry also for SFO—NRT. In this case,

the on flight traffic enplaned at SFO and destined for HKG, a beyond homeland point, shall be included in the SFO—NRT entry; a separate SFO—HKG entry is not required.

U.S., and all three of the on-flight markets which have the U.S. point ANC as either an origin or destination.

(d) Provisions to reduce paperwork:

(1) Nonstop Segment Entries. The flight stage data applicable to nonstop segment entries must be summarized to create totals by aircraft equipment type, within service class, within pairs-of-points.

(2) On-flight Market Entries. The applicable on-flight market entries shall be summarized to create totals by service class within pair-of-points.

(e) Preparation of Schedule T-100 (f):

(1) Section A—Indicative and flight pattern information. A copy of Schedule T-100(f) is shown at the end of this appendix. Section A defines the origin and destination points and the service class code to which the nonstop segment data in Section B and the on-flight market data in Section C are applicable. Section A information, along with the carrier code and report date, must be included on each schedule.

(2) Section B—Nonstop segment information. Section B of the schedule is used for reporting nonstop segment information by aircraft type. To reduce the number of schedules reported, space is provided for including data on multiple different aircraft types. Similarly, the on-flight market section has been included on a single Schedule T-100(f), along with the

nonstop segment data, rather than on a separate schedule.

(3) Section C—On-flight market information. Section C of the schedule is used for reporting on-flight market data. There will always be an on-flight market that corresponds to the nonstop segment. Because the on-flight market data are reported at the service class level rather than by aircraft type, a specific flight may produce more on-flight markets than nonstop segments, (see examples in paragraph (c) of this appendix), resulting in data reported in sections A and C only.

(f) [Reserved]

(g) Data element definitions:

(1) Service pattern information.

(i) Line A-1 Carrier code. Use the carrier code established by the Department. This code is provided to each carrier in the initial reporting letter from the Office of Airline Information (OAI). If there are any questions about these codes, contact the OAI Data Administration Division at the address in paragraph (a)(3) of this appendix.

(ii) Line A-2 Report date. This is the year and month to which the data are applicable. For example, 200009 indicates the year 2000, and the month of September.

(iii) Line A-3 Origin airport code. This is the departure airport, where an aircraft

begins a flight segment, and where the passengers originate in an on-flight market. Use the 3-letter code from the City/Airport Codes section of the Official Airline Guide Worldwide Edition. If no 3-letter code is available, OAI will assign one; the address is in paragraph (a)(3) of this appendix.

(iv) Line A-4 Destination airport code. This is the arrival airport, where an aircraft stops on a flight segment, and where passengers deplane (get off the flight) after reaching their destination in a market. Use the 3-letter code from the source described in paragraph (g)(1)(iii) of this appendix.

(v) Line A-5 Service class code. Select one of the following single letter codes which describes the type of service being reported on a given flight operation.

F = Scheduled Passenger/cargo Service
G = Scheduled All-cargo Service
L = Nonscheduled Civilian Passenger/Cargo Charter
P = Nonscheduled Civilian All-Cargo Charter
Q = Nonscheduled Services (Other than Charter)

(2) Nonstop segment information:

(i) Line B-1 Aircraft type code. Use the four digit numeric code prescribed in paragraph (h)(1) of this appendix. If no aircraft type code is available, OAI will

assign one. The address is in paragraph (a)(3) of this appendix.

(ii) Line B–2 Aircraft departures performed. This is the total number of physical departures performed with a given aircraft type, within service class and pair-of-points.

(iii) Line B–3 Revenue passengers transported. This is the total number of revenue passengers transported on a given nonstop segment. It represents the total number of revenue passengers on board over the segment without regard to their actual point of enplanement.

(iv) Line B–4 Revenue freight transported. This item is the total weight in kilograms (kg) of the revenue freight transported on a given nonstop segment without regard to its actual point of enplanement.

(3) On-flight market information:

(i) Line C–1 Total revenue passengers in market. This item represents the total number of revenue passengers, within service class, that were enplaned at the origin airport and deplaned at the destination airport.

(ii) Line C–2 Total revenue freight in market. This item represents the total weight in kilograms (kg) of revenue freight enplaned at the origin and deplaned at the destination airport.

(h) [Reserved]

(i) Joint Service.

(1) The Department may authorize joint service operations between two direct air carriers. Examples of these joint service operations are:

Blocked-space agreements;
Part-charter agreements;
Code-sharing agreements;
Wet-lease agreements, and similar arrangements.

(2) Joint-service operations shall be reported on BTS Form 41 Schedules T–100 and T–100(f) by the air carrier in operational control of the flight, *i.e.*, the air carrier that uses its flight crew to perform the operation. If there are questions about reporting a joint-service operation, contact the BTS Assistant Director—Airline Information at the address in paragraph (a)(3) of this appendix.

(a)(1) In addition to the other requirements of this subpart, each air carrier and foreign air carrier which, to any extent, avails itself of the limitation on liability to passengers provided by an international treaty, shall, at the time of delivery of the ticket, furnish to each passenger whose transportation is governed by the international treaty and whose place of departure or place of destination is in the United States, the following statement in writing:

Advice to International Passengers on Limitations of Liability

Passengers embarking upon a journey involving an ultimate destination or a stop in a country other than the country of departure are advised that the provisions of an international treaty (the Warsaw Convention, the 1999 Montreal Convention, or other treaty), as well as a carrier's own contract of carriage or tariff provisions, may be applicable to their entire journey, including any portion entirely within the countries of departure and destination. The applicable treaty governs and may limit the liability of carriers to passengers for death or personal injury, destruction or loss of, or damage to, baggage, and for delay of passengers and baggage.

Additional protection can usually be obtained by purchasing insurance from a private company. Such insurance is not affected by any limitation of the carrier's liability under an international

treaty. For further information please consult your airline or insurance company representative.

(2) The statement prescribed in paragraph (a)(1) of this section shall be printed or displayed in type at least as large as 10-point modern type and in a form that contrasts with the stock or background on:

(i) Each ticket, including electronic tickets;

(ii) A piece of paper either placed in the ticket envelope with the ticket or attached to the ticket; or

(iii) The ticket envelope.

(3) When a carrier is a signatory of a Department-approved intercarrier agreement implementing an international treaty, and such agreement contains specific text a carrier may use as a notice to international passengers regarding carrier liability, the carrier may substitute the exact text contained in the intercarrier agreement in lieu of the required text of the notice quoted in paragraph (a)(1) of this section.

(b) By December 31, 2019, each air carrier and foreign air carrier which, to any extent, avails itself of the limitation on liability to passengers provided by an international treaty, shall also cause to be displayed continuously in a conspicuous public place at each desk, station, and position in the United States which is in the charge of a person employed exclusively by it or by it jointly with another person, or by any agent employed by such air carrier or foreign air carrier to sell tickets to passengers whose transportation may be governed by an international treaty and whose place of departure or destination may be in the United States, a sign which shall have printed thereon the statement prescribed in paragraph (a)(1) of this section.

(c) It shall be the responsibility of each carrier to ensure that travel agents authorized to sell air transportation for such carrier comply with the notice provisions of paragraphs (a) and (b) of this section.

(d) Any air carrier or foreign air carrier subject to the provisions of this section which wishes to use a notice of limited liability of its own wording, but containing the substance of the language prescribed in paragraphs (a) and (b) of this section, may substitute a notice of its own wording upon approval by the Department.

(e) The requirements as to time and method of delivery of the notice (including the size of type) specified in paragraphs (a) and (b) of this section and the requirement with respect to travel agents specified in paragraph (c) of this section may be waived by the Department upon application and

showing by the carrier that special and unusual circumstances render the enforcement of the regulations impractical and unduly burdensome and that adequate alternative means of giving notice are employed.

(f) Applications for relief under paragraphs (d) and (e) of this section shall be filed with the Department's Office of International Aviation not later than 15 days before the date on which such relief is requested to become effective.

(g) Notwithstanding any other provisions of this section, no air taxi operator subject to part 298 of this subchapter shall be required to give the notices prescribed in this section, either in its capacity as an air carrier or in its capacity as an agent for an air carrier or foreign air carrier.

Appendix A to Subpart E of Part 291—Instructions to U.S. Air Carriers for Reporting Traffic and Capacity Data on Schedule T-100

(a) *Format of reports*—(1) *Automatic Data Processing (ADP) magnetic tape*. Refer to paragraph (d) of this appendix for instructions pertaining to mainframe and minicomputer reporting. The Department will issue “Accounting and Reporting Directives” to make necessary technical changes to these T-100 instructions. Technical changes which are minor in nature do not require public notice and comment.

(2) *Microcomputer diskette*—(i) *Optional specification*. If an air carrier desires to use its personal computers (PC’s), rather than mainframe or minicomputers to prepare its data submissions, the following specifications for filing data on diskette media apply.

(ii) *Reporting medium*. Microcomputer ADP data submission of T-100 information must be on IBM compatible disks. Carriers wishing to use a different ADP procedure must obtain written approval to do so from the BTS Assistant Director—Airline Information. Requests for approval to use alternate methods must disclose and describe the proposed data transmission methodology. Refer to paragraph (i) of this appendix for microcomputer record layouts.

(iii) *Microcomputer file characteristics*. The files will be created in ASCII delimited format, sometimes called Data Interchange Format (DIF). This form of recording data provides for variable length fields (data elements) which, in the case of alphabetic data, are enclosed by quotation marks (“”) and separated by a comma (,) or tab. Numeric data elements that are recorded without editing symbols are also separated by a comma (,) or tab. The data are identified by their juxtaposition within a given record. Therefore, each record must contain the exact number of data elements, all of which must be juxtapositionally correct. Personal computer software including most spreadsheets, data base management programs, and BASIC are capable of producing files in this format.

(b) *Filing date for reports*. The reports must be received at BTS within 30 days following the end of each reporting period.

(c) *Address for filing*. Data Administration Division, RTS-42, Office of Airline Information, Bureau of Transportation Statistics, U.S. Department of Transportation, 1200 New Jersey Avenue SE, Washington, DC 20590-0001.

(d) *ADP format for magnetic tape*—(1) *Magnetic tape specifications*. IBM compatible 9-track EBCDIC recording. Recording density of 6250 or 1600 bpi. The order of recorded information is:

- (i) Volume label.
- (ii) Header label.
- (iii) Data records.
- (iv) Trailer label.

(2) [Reserved]

(e) *External tape label information*. (1) Carrier name.

(2) Report date.

(3) File identification.

(4) Carrier address for return of tape reel.

(f) *Standards*. It is the policy of the Department to be consistent with the American National Standards Institute and the Federal Standards Activity in all data processing and telecommunications matters. It is our intention that all specifications in this application are in compliance with standards promulgated by these organizations.

(g) *Volume, header, and trailer label formats*—(1) *Use standard IBM label formats*. The file identifier field of the header labels should be “T-100.SYSTEM”.

(h) *Magnetic tape record layouts for T-100*—(1) *Nonstop segment record layout*.

(i) *Record layouts for microcomputer diskettes.* The record layouts for diskette are generally identical to those shown for magnetic tape, with the exception that delimiters (quotation marks, tabs and commas) are used to separate fields. It is necessary that the order of fields be maintained in all records.

(1) *File characteristics.* The files will be created in ASCII delimited format, sometimes called Data Interchange Format (DIF). This form of recording data provides for variable length fields (data elements) which, in the case of alphabetic data, are enclosed by quotation marks (") and separated by a comma (,) or tab. Numeric data elements that are recorded without editing symbols are also separated by a comma (,) or tab. The data are identified by their juxtaposition within a given record. Therefore, it is critical that each record contain the exact number of data elements, all of which must be juxtapositionally correct. PC software including most spreadsheets, data base management programs, and BASIC produce minidisk files in this format.

(2) *File naming conventions for diskettes.* For microcomputer reports, each record type should be contained in a separate DOS file on the same physical diskette. The following DOS naming conventions should be followed:

- (i) Record type S = SEGMENT.DAT
- (ii) Record type M = MARKET.DAT

This Surety Trust Agreement is written to assure compliance by Operator with the provisions of part 380 of the Department’s regulations and other rules and regulations of the Department relating to insurance or other security for the protection of charter participants. It shall inure to the benefit of any and all charter participants to whom Operator may be held legally liable for any of the damages herein described.

It is mutually agreed by and between Operator and Trustee that Trustee shall manage the corpus of the trust and carry out the purposes of the trust as hereinafter set forth during the term of the trust for the benefit of charter participants (who are hereinafter referred to as “Beneficiaries.”)

3. Who have given notice of such claim or claims in accordance with this Trust Agreement, but who have not been paid by Operator.

The operator shall convey to Trustee legal title to the trust corpus, which has a value of \$ _____ by the time of the execution of this Agreement.

Trustee shall assume the responsibilities of Trustee over the said trust corpus and shall distribute from the trust corpus to any and all Beneficiaries to whom Operator, in its capacity as a Public Charter operator, may be held legally liable by reason of Operator's failure faithfully to perform, fulfill, and carry out all contracts, agreements, and arrangements made by Operator, while this trust is in effect with respect to the receipt of monies and proper disbursement thereof pursuant to part 380 of the Department's regulations in connection with said charters, such damages as will discharge such liability while this trust is in effect; *Provided, however,* that the liability of the trust to any Beneficiary shall not exceed the charter price (as defined in part 380 of the Department's regulations) paid by or on behalf of any such Beneficiary; *Provided, further,* that there shall be no obligation of the trust to any Beneficiary if Operator shall pay or cause to be paid to any Beneficiary any sum or sums for which Operator may be held legally liable by reasons of its failure faithfully to perform, fulfill, and carry out all contracts, agreements, and arrangements made by Operator in its capacity as Public Charter Operator while this trust is in effect with respect to the receipt of monies and proper disbursement thereof pursuant to part 380 of the Department's regulations; *and provided still further,* that the liability of the trust as administered by Trustee shall not be discharged by any payment or succession of payments hereunder, unless and until such payment or payments, shall amount in the aggregate to \$ _____.
