

deliberately review their rules in accordance with DOT's 1979 Regulatory Policies and Procedures (44 FR 11034), Executive Order (E.O.) 12866, E.O. 13563, and section 610 of the Regulatory Flexibility Act. That process is summarized in Appendix D of DOT's semi-annual regulatory agenda (*e.g.*, 81 FR 94784). In E.O. 13771 and E.O. 13777, President Trump directed agencies to further scrutinize their regulations. Comments received will inform the review described in this notice and supplement MARAD's periodic regulatory review and its activities under E.O. 13771 and E.O. 13777. This request for comments is narrowly focused on improving and modernizing MARAD's program administration.

Accordingly, MARAD has identified its regulations at 46 CFR part 355 governing requirements for evidencing United States citizenship for consideration consistent with the President's direction. This notice seeks to solicit comments to ensure that MARAD's programs remain effective, modern, and the least burdensome to the public. As part of our review, MARAD is issuing this notice to engage the public and the broad spectrum of stakeholders that may be affected. Information received will be used to evaluate the issues and determine whether to propose a change in how corporations evidence their citizenship.

Citizenship eligibility criteria and documentation requirements may affect stakeholders who participate, directly or indirectly, in MARAD programs and activities, including ship managers and agents of MARAD-owned ships (herein collectively referred to as "Vessel Operators") which may be used by the Department of Defense (DOD) in support of certain DOD-controlled activities. For example, Vessel Operators are required by regulation to be at least majority owned and controlled by United States citizens at each tier of ownership.

Scope of Comments

MARAD is interested in learning how it could reduce or remove regulatory burdens on the public. Accordingly, commenters may want to focus on the following: (1) Recognition of modern business forms in addition to corporations (*e.g.*, limited liability companies and limited partnerships) and modern securities ownership practices (*e.g.*, street name securities); (2) aligning with current best business practices; (3) reducing the cost of compliance; and (4) revising the corporate citizenship affidavit.

Content of Comments

We are interested in information on how any changes to 46 CFR part 355 could impact small businesses, either positively or negatively. In describing a burden placed on your organization by our regulations or potential changes to the regulations, direct experience and quantifiable data are more useful than anecdotal descriptions. If the commenter believes that there is a less burdensome alternative, the commenter should describe that alternative in verifiable detail.

Under this notice, MARAD is not soliciting petitions for rulemaking.

SUPPLEMENTARY INFORMATION:

Background

Improvement of regulations is a continuous focus for the Department of Transportation (DOT) and MARAD. For that reason, DOT/MARAD regularly and deliberately review their rules in accordance with DOT's 1979 Regulatory Policies and Procedures (44 FR 11034), Executive Order (E.O.) 12866, E.O. 13563, and section 610 of the Regulatory Flexibility Act. In E.O. 13771 and E.O. 13777, President Trump directed agencies to further scrutinize their regulations. Comments received will inform the review described in this notice and supplement MARAD's periodic regulatory review and its activities under E.O. 13771 and E.O. 13777. This request for comments is narrowly focused on improving and modernizing MARAD's program administration.

Accordingly, MARAD has identified its AFA regulations governing citizenship procedures for consideration consistent with the President's direction. Scope of Comments

MARAD is interested in learning how it could reduce or remove regulatory burdens on the public. Accordingly, commenters may want to focus on the following: (1) Whether there are less burdensome methods to evidence corporate citizenship annually; (2) how those alternatives may be applied to improve MARAD program administration consistent with E.O. 13771; and (3) how program participants will benefit from a revision of our AFA regulations.

Fisheries of the Northeastern United States; Atlantic Mackerel, Squid, and Butterfish Fisheries; Specifications

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Proposed rule, request for comments.

SUMMARY: NMFS proposes new *Illex* squid specifications, while maintaining previously approved longfin squid and butterfish specifications for the 2019 fishing year. NMFS previously set specifications for all three species for 2018–2020 but proposes to increase the 2019 *Illex* squid acceptable biological catch by 2,000 mt based on updated scientific advice. No changes to the previously approved 2019 longfin squid or butterfish specifications are proposed in this action. This action is necessary to specify catch levels for the *Illex* squid fishery based on updated information

on allowable catch levels and to provide notice that NMFS is maintaining the previously approved longfin squid and butterfish specifications. These proposed specifications are intended to promote the sustainable utilization and conservation of the squid and butterfish resources.

DATES: Public comments must be received by May 31, 2019.

ADDRESSES: Copies of supporting documents used by the Mid-Atlantic Fishery Management Council, including the Environmental Assessment (EA), the Supplemental Information Report (SIR), the Regulatory Impact Review (RIR), and the Regulatory Flexibility Act (RFA) analysis are available from: Dr. Christopher M. SUPPLEMENTARY INFORMATION:

Background

This rule proposes specifications, which are the combined suite of commercial and recreational catch levels established for one or more fishing years, for *Illex* squid. Section 302(g)(1)(B) of the Magnuson-Stevens Fishery Conservation and Management Act states that the Scientific and Statistical Committee (SSC) for each regional fishery management council shall provide its Council ongoing scientific advice for fishery management decisions, including recommendations for acceptable biological catch (ABC), preventing overfishing, ensuring maximum sustainable yield, and achieving rebuilding targets. The ABC is a level of catch that accounts for the scientific uncertainty in the estimate of the stock’s defined overfishing level (OFL).

The regulations implementing the Atlantic Mackerel, Squid, and Butterfish Fishery Management Plan (FMP) require the Mid-Atlantic Fishery Management Council’s Atlantic Mackerel, Squid, and Butterfish Monitoring Committee to develop specification recommendations for each species based upon the ABC advice of the Council’s SSC. The FMP regulations also require the specification of annual catch limits (ACL) and accountability measure (AM) provisions for butterfish. Both squid species are exempt from the ACL/AM requirements because they have a life cycle of less than one year. In addition, the regulations require the specification of domestic annual harvest (DAH), domestic annual processing (DAP), total allowable level of foreign fishing (TALFF), joint venture processing (JVP), commercial and recreational annual catch targets (ACT), the butterfish mortality cap in the longfin squid fishery, and initial optimum yield (IOY) for both squid species.

On March 1, 2018 (83 FR 8764), we published a final rule in the **Federal Register** implementing *Illex* and longfin squid and butterfish specifications for 2018 and projected specifications for fishing years 2019 and 2020. Since then, the Council’s SSC met on May 8, 2018, to reevaluate the 2019 specifications based upon the latest information. At that meeting, the SSC concluded that no adjustments to these specifications were warranted. However, the SSC met again on September 18, 2018, at the request of the Council to reevaluate its *Illex* squid specification recommendation and consider increasing the 2019 *Illex* landing limit given the fishery had fully harvested available quotas in both the 2017 and 2018 fishing years. The SSC reiterated its observation that landings
