Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Nonindigenous Aquatic Species Sighting Reporting Form and Alert Registration Form

AGENCY: U.S. Geological Survey, Interior.

ACTION: Notice of information collection; request for comment.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, we, the U.S. Geological Survey (USGS) are

proposing to renew an information collection.

DATES: Interested persons are invited to submit comments on or before December 5, 2019.

ADDRESSES: Send written comments on this information collection request (ICR) to the Office of Management and Budget's Desk Officer for the Department of the Interior by email at OIRA_Submission@omb.eop.gov; or via facsimile to (202) 395-5806. Please provide a copy of your comments to U.S. Geological Survey, Information Collections Officer, 12201 Sunrise Valley Drive MS 159, Reston, VA 20192; or by email to gs-info_collections@usgs.gov. Please reference OMB Control Number 1028-0098 in the subject line of your comments.

FOR FURTHER INFORMATION CONTACT: To request additional information about this ICR, contact Matthew Neilson by email at mneilson@usgs.gov, or by telephone at (352) 264-3519. You may also view the ICR at <http://www.reginfo.gov/public/do/PRAMain>.

SUPPLEMENTARY INFORMATION: In accordance with the Paperwork Reduction Act of 1995, we provide the general public and other Federal agencies with an opportunity to comment on new, proposed, revised, and continuing collections of information. This helps us assess the impact of our information collection requirements and minimize the public's reporting burden. It also helps the public understand our information collection requirements and provide the requested data in the desired format.

A **Federal Register** notice with a 60-day public comment period soliciting comments on this collection of information was published on July 15,

2019 (84 FR 33776). No comments were received.

We are again soliciting comments on the proposed ICR that is described below. We are especially interested in public comment addressing the following issues: (1) Is the collection necessary to the proper functions of the USGS; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the USGS enhance the quality, utility, and clarity of the information to be collected; and (5) how might the USGS minimize the burden of this collection on the respondents, including through the use of information technology.

Comments that you submit in response to this notice are a matter of public record. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Abstract: More than 6,500 nonindigenous species are now established in the United States, posing risks to native species, valued ecosystems, and human and wildlife health. These invasive species extract a huge cost, an estimated \$120 billion per year, to mitigate their harmful impacts. The current annual environmental, economic, and health-related costs of invasive species exceed those of all other natural disasters combined.

Through its Invasive Species Program (http://www.usgs.gov/ecosystems/invasive_species/), the U.S. Geological Survey (USGS) plays an important role in Federal efforts to combat invasive species in natural and semi-natural areas through early detection and assessment of newly established invaders; monitoring of invading populations; and improving understanding of the ecology of invaders and factors in the resistance of habitats to invasion. The USGS provides the tools, technology, and information supporting efforts to prevent, contain, control, and manage invasive species nationwide. To meet user needs, the USGS also develops methods for compiling and synthesizing accurate and reliable data and information on invasive species for inclusion in a distributed and integrated web-based information system.

As part of the USGS Invasive Species Program, the Nonindigenous Aquatic Species (NAS) database (<http://nas.er.usgs.gov/>) functions as a repository and clearinghouse for occurrence information on nonindigenous aquatic species from across the United States. It contains locality information on approximately 1,300 species of vertebrates, invertebrates, and vascular plants introduced since 1850. Taxa include foreign species as well as those native to North America that have been transported outside of their natural range. The NAS website provides immediate access to new occurrence records through a real-time interface with the NAS database. Visitors to the website can use a set of predefined queries to obtain lists of species according to state or hydrologic basin of interest. Fact sheets, distribution maps, and information on new occurrences are continually posted and updated. Dynamically generated species distribution maps show the spatial accuracy of the locations reported, population status, and links to more information about each report.

Title of Collection: Nonindigenous Aquatic Species Sighting Reporting Form and Alert Registration Form.

OMB Control Number: 1028-0098.

Form Number: None.

Type of Review: Extension of a currently approved collection.

Respondents/Affected Public: State and local government employees, university personnel, and private individuals.

Total Estimated Number of Annual Respondents: We estimate approximately 350 respondents per year for the sighting report form (some respondents will submit multiple reports per year), and 50 respondents (*i.e.*, new registrations) per year for the alert registration form.

Total Estimated Number of Annual Responses: We estimate 600 responses per year for the sighting report form, and 50 responses (*i.e.*, new registrations) per year for the alert registration form.

Estimated Completion Time per Response: We estimate 3 minutes for the sighting report form, and 1 minute for the alert registration form.

Total Estimated Number of Annual Burden Hours: We estimate 30 hours for the sighting report form, and 1 hour for the alert registration form; a total of 31 hours for the two forms.

Respondent's Obligation: Voluntary.

Frequency of Collection: On occasion.

Total Estimated Annual Nonhour

Burden Cost: None.

An agency may not conduct or sponsor and a person is not required to

respond to a collection of information unless it displays a currently valid OMB control number.

The authority for this action is the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*)
