History and Description of the Remains

In 1977 and 1978, human remains representing, at minimum, one individual were removed from CA-FRE-622, in Fresno County, CA. Fresno City College instructor Don Wren excavated this site as part of the Helms Project. In January 2017, funded by a 2016 NAGPRA Consultation/Documentation grant awarded to the State Center Community College District, an osteological examination of the faunal collections was conducted to determine if human remains were present. That examination resulted in the identification of the human remains described in this inventory. The human remains represent one adult of indeterminate sex, represented by seven bone fragments. No known individuals were identified. The two associated funerary objects are one ochre fragment and one steatite fragment.

Determinations Made by the State Center Community College District—Fresno City College

Officials of the State Center Community College District—Fresno City College have determined that:

- Pursuant to 25 U.S.C. 3001(9), the human remains described in this notice represent the physical remains of one individual of Native American ancestry based on archeological context.
- Pursuant to 25 U.S.C. 3001(3)(A), the two objects described in this notice are reasonably believed to have been placed with or near individual human remains at the time of death or later as part of the death rite or ceremony.
- Pursuant to 25 U.S.C. 3001(2), there is a relationship of shared group identity that can be reasonably traced between the Native American human remains and associated funerary objects and the Big Sandy Rancheria of Western Mono Indians of California (previously listed as the Big Sandy Rancheria of Mono Indians of California); Cold Springs Rancheria of Mono Indians of California; and the Table Mountain Rancheria (previously listed as the Table Mountain Rancheria of California), hereafter referred to as "The Tribes," based on geography and oral tradition.

History and Description of the Remains

Human remains representing, at minimum, one individual were removed from an undetermined location, but probably somewhere in Ogemaw County, MI. The human remains were found in the Ralph Stroebel collection and in association with materials from the Rifle River Earthworks (20OG1, 20OG2, 20OG3, and 20OG4). However, notes describing Stroebel's collection from the Earthworks and surrounding area do not list any bone materials. Furthermore, the dates listed in the notes do not match the dates written on some of the specimens. These discrepancies leave open the possibility that the human remains are not actually from the area around the earthworks. According to accompanying labels the individual was found in 1943. No known individuals were identified. No associated funerary objects are present.

The human remains are not listed specifically in museum records, but they may have been part of a large accession of historical and archeological material donated to the Historical Society of Saginaw County, Inc. in 1987. Most of the archeological material in the Stroebel collection is known to have been surface collected; the same is likely true for the human remains. However, no notes or other documentation describing the circumstances of discovery of the remains are known to exist. The fragmentary human remains are presumed to be Native American based solely on their probably having been removed from a site or sites known to have been occupied by Native Americans in prehistoric times.

Determinations Made by the Historical Society of Saginaw County, Inc.

Officials of the Historical Society of Saginaw County, Inc. have determined that:

- Pursuant to 25 U.S.C. 3001(9), the human remains described in this notice

are Native American based on their general archeological context.

- Pursuant to 25 U.S.C. 3001(9), the human remains described in this notice represent the physical remains of one individual of Native American ancestry.
- Pursuant to 25 U.S.C. 3001(2), a relationship of shared group identity cannot be reasonably traced between the Native American human remains and any present-day Indian Tribe.
- According to final judgments of the Indian Claims Commission or the Court of Federal Claims, the land from which the Native American human remains were removed is the aboriginal land of the Saginaw Chippewa Indian Tribe of Michigan.
- Treaties, Acts of Congress, or Executive Orders, indicate that the land from which the Native American human remains were removed is the aboriginal land of The Consulted and Invited Tribes.
- Pursuant to 43 CFR 10.11(c)(1), the disposition of the human remains may be to The Consulted and Invited Tribes.

Additional Requestors and Disposition

Representatives of any Indian Tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains should submit a written request with information in support of the request to Jeffrey Sommer, Historical Society of Saginaw County, Inc., 500 Federal Avenue, Saginaw, MI 48607, telephone (989) 752-2861 Ext. 308, email jsommer@castlemuseum.org, by April 17, 2019.
